

# Soichiro Nishimori

✉ nishimori@ms.k.u-tokyo.ac.jp

🌐 <https://nissymori.github.io/>

## Education

- Apr. 2024 – Present    📖 **Doctor of Engineering, Graduate School of Frontier Science, The University of Tokyo Chiba.**  
Supervisor: Professor Masashi Sugiyama.  
Theme: *Reinforcement Learning under Weak Supervision.*
- Oct. 2025 – Feb. 2026    📖 **Visiting PhD, School of Computer Science, The University of Sydney.**  
Supervisor: Professor Tongliang Liu  
Theme: *Reinforcement Learning under Weak Supervision.*
- Apr. 2022 – Mar. 2024    📖 **Master of Engineering, Graduate School of Frontier Science, The University of Tokyo Chiba.**  
Supervisor: Professor Masashi Sugiyama.  
Theme: *Offline Reinforcement Learning under Weak Supervision.*
- Apr. 2020 – Mar. 2022    📖 **Bachelor of Integrated Human Studies, Kyoto University Kyoto.**  
Supervisor: Professor Shin Ishii.  
Theme: *Partially Observable Markov Decision Process (POMDP).*
- Apr. 2018 – Mar. 2020    📖 **Faculty of Economics (before internal transfer), Kyoto University Kyoto.**

## Research Publications

### International Conference

- 1    **S. Nishimori**, X.-Q. Cai, J. Ackermann, and M. Sugiyama, “Offline reinforcement learning with domain-unlabeled data,” in *Reinforcement Learning Conference*, 2025.
- 2    Y. Tang, Y. Zhang, J. Ackermann, Y.-J. Zhang, **S. Nishimori**, and M. Sugiyama, “Recursive reward aggregation,” in *Reinforcement Learning Conference*, 2025.
- 3    S. Koyamada, **S. Nishimori**, and S. Ishii, “A batch sequential halving algorithm without performance degradation,” in *Reinforcement Learning Conference*, 2024.
- 4    S. Koyamada, S. Okano, **S. Nishimori**, *et al.*, “Pgx: Hardware-accelerated parallel game simulators for reinforcement learning,” vol. 36, 2023, pp. 45 716–45 743.
- 5    S. Koyamada, K. Habara, N. Goto, S. Okano, **S. Nishimori**, and S. Ishii, “Mjx: A framework for mahjong ai research,” in *2022 IEEE Conference on Games (CoG)*, IEEE, 2022, pp. 504–507.

### Preprints

- 1    **S. Nishimori**, P. Parmas, S. Koyamada, *et al.*, “Emergence of exploration in policy gradient reinforcement learning via retrying,” 2026. 🔗 URL: <https://openreview.net/forum?id=msX2KKICRr>.
- 2    **S. Nishimori**, Y.-J. Zhang, T. Lodkaew, and M. Sugiyama, “On symmetric losses for robust policy optimization with noisy preferences,” *arXiv preprint arXiv:2505.24709*, 2025.

### Projects

- 1 **S. Nishimori**, O. Shinri, H. Keigo, E. Yu, K. Sotetsu, and S. Masashi, *Mahjax: A gpu-accelerated for reinforcement learning in jax*, 2025.
- 2 **S. Nishimori**, *Jax-corl: Clean sigle-file implementations of offline rl algorithms in jax*. 2024.

## Experiences

---

- |                       |                                                                                                                                                      |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Dec. 2020 – Apr. 2022 |  <b>Data Science Intern</b><br>Scrumsign.Inc -Kobe, Japan           |
| Jul. 2022 – Sep. 2023 |  <b>Research Intern</b><br>OMRON SINICX – Tokyo, Japan              |
| Apr. 2024 – Present   |  <b>Research Part-time Worker</b><br>RIKEN AIP- Tokyo, Japan        |
| Aug. 2024 – Oct. 2024 |  <b>Research Intern</b><br>Matsuo-Iwasawa Lab, UTokyo- Tokyo, Japan |

## Fellowships

---

- |                      |                                                                                                                                                                                                                                                      |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Apr. 2024- Mar. 2027 |  Research Fellowship for Young Scientists (DC1)<br>Japanese Society for the Promotioin of Science<br>200 000 JPY / month, 2200000 JPY / 3 years (research funding) |
| Aug. 2025            |  Travel Grant<br>Reinforcement Learning Conference (RLC) 2025<br>825 USD                                                                                          |

## Skills

---

- |           |                                                                                                                                                                    |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages |  Japanese, English (TOEFL-iBT 96).                                              |
| Coding    |  Python, <b>JAX</b> , Pytorch, and $\LaTeX$ , ...                               |
| Knowledge |  Statistical Machine Learning, Reinforcement Learning, and Bayesian Statistics. |
| Interests |  Weakly Supervised RL, Model-based RL, Game AI, Planning and Offline RL.        |
